What are CROSSRAY® BBQ's?

CROSSRAY® BBQs are a result of technical innovation and development over 10 years.

The design challenge was to create something “NEW” in the BBQ market: redefining a BBQ to perform like cooking over a bed of red hot coals; providing even heat, reducing flare-ups and to be a true multi-functional outdoor cooking appliance, that produces tastier and juicier food, and so easy.

This is achieved using patented infrared cooking technology and includes both gas and electric versions, in portable, in-built and outdoor kitchen options. CROSSRAY gas BBQ's are the only BBQ that can provide controllable, even heat from 140°C to 350°C+, while using 50% less gas than a conventional BBQ.

Main features of the CROSSRAY technology

World class design and construction, it is built to last using only the best materials.

CROSSRAY

The Future of BBQ

Creating the ultimate outdoor cooking experience

A 10-year obsession taking innovation, design, and efficiency to a whole new level.

The dedication and vision of designer Mark Stone – in collaboration with the world famous team at Porsche Design – has seen the quality and performance of the CROSSRAY BBQ recognised as an industry leader.

The ‘Porsche of BBQs’ has many similarities with its namesake – with a sleek and stylish design encasing an efficient and powerful engine unit that goes from 0 to top speed in seconds!

Fundamental to the engine room of the CROSSRAY are revolutionary surface combustion gas infrared burners – the driving force behind an evenly spread heat that provides intensity and sizzle to the entire cooking surface.

The CROSSRAY® is the only BBQ that can provide controllable even heat from 140°C to nearly 400°C, amazingly using 50 percent less gas to achieve these industry leading temperatures.

This intense heat allows the CROSSRAY to redefine the outdoor gas BBQ and imitate perfectly the traditional way of cooking over a bed of red-hot coals.

The additional options of being used as a normal oven, pizza oven, long-slow smoking oven, conventional grill and a traditional wood-fired stove make the CROSSRAY the true definition of a multi-functional outdoor cooking appliance.

The revolutionary design and powerhouse performance of the CROSSRAY BBQ has not happened by chance – with designer Mark Stone leaving no stone unturned in the quest for outdoor cooking perfection.

Mark had a burning desire, a passion if you like, to create something new and innovative in the traditionally staid and unadventurous world of BBQ design.

CROSSRAY has been recognised for its design excellence – receiving a coveted Good Design Award for outstanding product design and innovation.

It is so simple to use – anybody can produce professional-quality cooking with CROSSRAY.

Electric BBQs

featuring infra-red technology

Taking the Electric BBQ to new heights

Plug-in, preheat and prepare for the “Sizzle” of the most powerful electric BBQ on the market.

CROSSRAY electric BBQ's provide a cooking experience just like a traditional gas BBQ, via the unique high-intensity electric infra-red element technology. It's just like cooking over red hot coals.

Available as a portable table top BBQ; add mobility with a trolley and stainless steel foldable side shelves, or really add class to your outdoor area with a compact kitchen option that has the BBQ flush mounted into a sintered stone benchtop with single fridge.

Main features of the complete electric range

Stainless steel construction with double skin hood, cook with the lid up or down.

Dual Zone cooking (High/Low, Front/Back) with grill & hotplate as standard.

High output carbon infra-red electric elements (2 x 750W). Simply plug in.

LED indicator with 120 Min timer and 300°C safety cut-off

Perfect for when you want real BBQ performance, without the hassle or restrictions of gas bottles.

The Range

Portable Electric BBQ

Model TCE15F-2

Fully portable for your home or holidays, with a high hood suitable for all food types including large meats and 300°C maximum BBQ performance.

Electric BBQ with Trolley

Model TCE15TR

A portable and versatile trolley solution for outdoor cooking, with wheels, foldable stainless steel side shelves and additional top/bottom shelves for extra storage space. The BBQ also lifts out, so you can take it anywhere.

Compact Outdoor Kitchen Electric BBQ & Fridge

Model TCE15F-MK1

The single fridge, robust double skin doors and fold-down top shelf provide the perfect platform for the high hood CROSSRAY BBQ to be flush-mounted in a high-end, sintered stone benchtop.

Portable Electric Barbecue
